

Psy Development Center

Psychological support for children, teenagers, adults and families, guided by current research and clinical recommendations. We tailor the format to each client's concerns, age, needs and goals.

In person

Online

Children, teenagers, adults

Services

Individual Therapy for Adults

Anxiety, low mood, stress, burnout, life transitions and adjustment.

Support for Children & Teenagers

Anxiety, behaviour, emotional regulation, ADHD, ASD, learning and parent-child relationships.

Psychological Assessments

Comprehensive assessment of development, emotions, behaviour and learning; school readiness.

ADOS-2

Standardised observational assessment when autism spectrum conditions are suspected.

Anxiety Management Programme

For university students: self-regulation skills and reducing exam-related anxiety.

Perinatal Support

Support for families during pregnancy, preparation for parenthood and after a baby is born.

Mindful Parenting

Understanding a child's behaviour, parental anxiety and resilient family communication.

Strong Career Assessment

Interest testing to explore study options and professional pathways.

How to Begin

- Message us on Telegram or send an email.
- Our care coordinator clarifies your request and suggests a format.
- Together we agree goals, appointment rhythm and next steps.

Approaches

- Cognitive Behavioural Therapy (CBT)
- Dialectical Behaviour Therapy (DBT)
- Emotional regulation skills
- Trauma-focused approach
- ABA (Applied Behaviour Analysis)

Methods are selected individually. Psychological support does not replace medical care when it is needed.

Who We Support

- Children and parents
- Teenagers
- Adults
- Families
